

```
// rootCmd represents the base command when called without any subcommands
var rootCmd = &cobra.Command{
    Use:     "cli-for-humans",
    Short:   "A brief description of your application",
    Long:    `A longer description that spans multiple lines and likely contains
examples and usage of using your application. For example:

Cobra is a CLI library for Go that empowers applications.
This application is a tool to generate the needed files
to quickly create a Cobra application.` ,
    // Uncomment the following line if your bare application
    // has an action associated with it:
    // Run: func(cmd *cobra.Command, args []string) { },
}
```

```
$ cat cmd/root.go
```

```
> g
```
