```go
// rootCmd represents the base command when called without any subcommands
var rootCmd = &cobra.Command{
	Use:   "cli-for-humans",
	Short: "A brief description of your application",
	Long:  `A longer description that spans multiple lines and likely contains
examples and usage of using your application. For example:

Cobra is a CLI library for Go that empowers applications.
This application is a tool to generate the needed files
to quickly create a Cobra application.`,
	// Uncomment the following line if your bare application
	// has an action associated with it:
	// Run: func(cmd *cobra.Command, args []string) { },
}
```

$ cat cmd/root.go
